Professional Summary

Information Systems graduate from Debre Birhan University with hands-on experience in web development, cybersecurity, and IoT security. Specialized in building and securing systems — from AI chatbots and web platforms to IoT honeypots. Developed practical cybersecurity skills through the INSA Summer Cybersecurity Talent Program. Currently working at Droga Consulting on Droga Pharmacy and CEE projects as a Web Developer.

Education

Bachelor's Degree in Information Systems – Debre Birhan University, Ethiopia (2025)

- Final Year Project: Agriculture Chatbot – AI-based assistant for farmers (Winner of University Innovation Competition)
- Exit Exam Score: 71%

Professional Experience

Web Developer – Droga Consulting (2025 – Present)

- Working on Droga Pharmacy and CEE projects — developing and maintaining web systems.
- Collaborate with backend teams to optimize digital business operations.

Red Team Trainee – INSA Cybersecurity Summer Camp (2025)

- Selected for INSA Summer Cybersecurity Talent Program.

- Hands-on experience in penetration testing, web & network exploitation, and privilege escalation.
- Built an IoT Honeypot System to detect and analyze IoT cyberattacks.
- Participated in Red Team-style CTF challenges.

Intern – Ministry of Innovation (2024)

- Developed a Library Management System with secure backend integration.
- Applied secure coding practices and optimized database structures.

Web Developer – Efuye Gela Company (2024)

- Built a full E-commerce website using React.js and Node.js.
- Enhanced performance, security, and UI design.

Projects

- Droga Pharmacy Project – Current project at Droga Consulting
- CEE Project – Current project at Droga Consulting
- IoT Honeypot System – Detects IoT cyberattacks (INSA Project)
- Agriculture Chatbot – AI chatbot for farmers (Competition Winner)
- Automated Vulnerability Scanner – Red Team tool
- Library Management System – Internship project
- E-commerce Platform – React.js + Node.js
- Restaurant Management System – React.js dashboard app

Certifications

- A+ Certificate – ITSc
- Linux Administration – ITSc
- Windows Server 2019 – ITSc
- Internet Programming – ITSc

- Cybersecurity Training – INSA Summer Camp

Technical Skills

Cybersecurity: Penetration testing, network & web exploitation, privilege escalation, post-exploitation, CTF challenges
Tools & Platforms: Kali Linux, Nmap, Metasploit, Burp Suite, CyberChef, Hash-Identifier
Web Development: React.js, Node.js, JavaScript, HTML, CSS
Programming: Python, JavaScript
Databases: MySQL, MongoDB
System Administration: Linux, Windows Server 2019
Version Control: Git, GitHub

Languages

Oromiffa | Amharic | English

Achievements

- 🏆 Winner – Agriculture Chatbot Competition (Debre Birhan University)
- 🎯 Selected for INSA Summer Cybersecurity Talent Program (2025)
- 💻 Developed IoT Honeypot System – Red Team project at INSA
